Trematodes of fishes, 125.
Triton eggs, development of enucleated, 138.
Triturus granulosa, DNA content of somatic tissues of, 242.
TRUONG, SIMONE, AND ERNST DORNFELD. Desoxyribosenucleic acid content in the nuclei of salamander somatic tissues, 242.
Tubularia, cell movement, regeneration rate and axial gradients in, 219.
Tubularia primordia segments, fate of, 196.
Tunicate eggs, respiratory rhythms in, 366.

VARIATIONS in temperature and light response in plankton, 175.
DE VILLAFRANCA, G. W. Adenosinetriphosphatase activity of squid mantle muscle (Loligo pealii), 113.
Viscosity of lobster hemocyanin, 290.

WEIGHT, body, influence of on rate of oxygen consumption of amphipod, 253.
WILBUR, KARL M., AND LOUISE H. JODREY. Studies on shell formation. V. The inhibition of shell formation by carbonic anhydrase inhibitors, 359.
WILBUR, KARL M. *See* LOUISE H. JODREY, 346.
Woodroach thoracic muscle, ATP-ase activity of, 45.
Worm, annelid, distribution of in relation to salinity, 326.

X-IRRADIATION of Fundulus gametes and embryos, 318.
X-irradiation of Triton sperm, 138.
X-radiation, effect of on Tetrahymena enzyme systems, 308.
X-ray effects on adult Artemia, 277.

ZEUTHEN, ERIK. Mitotic respiratory rhythms in single eggs of Psammechinus miliaris and of Ciona intestinalis, 366.
Zooplankton, temperature and light responses of, 175.
